QuickSilver® dump body liners are engineered to withstand harsh field conditions, protect your equipment and handle any kind of bulk material, so no more:

- sticky or frozen loads
- backhoe cleanouts
- chewed up floors
- warming sheds
- shoveling
- risky dump angles
- damaged hydraulics and brakes
- washdowns

With QuickSilver® liners, drivers stay put and loads do the moving

HANDLES ANY TEMPERATURE HOT ASPHALT WITH EASE

All kinds of loads.

Easily switch from hauling one bulk material to another. With QuickSilver® liners, you can haul hot asphalt mix one day, sand, gravel, aggregate, lime, topsoils, petroleum coke or some other material the next day.

All kinds of weather.

Loads move – during dry or humid heat of summer, and subfreezing temperatures of winter.

All kinds of equipment.

From dump trailers and dump bodies to bottom dumps, gravel trains or transfer trailers, QuickSilver® liners mean faster load release and less equipment damage.

Dependability guaranteed.

QuickSilver® liners are so durable and dependable that Linings, Inc. guarantees their success. Lifetime non-prorated warranty!

- QuickSilver, Durapro, and Haulk are manufactured under **ISO 9001 Certified Standards.**

Tougher than the day is long.

QuickSilver®'s impact strength has been tested to – 100° F without cracking or breaking.

- **100% Virgin Resin UHMW-PE**
- **6% Silicone – Industry Best Release and Wear**
- **Exclusive Additives Package that extends life of liner**
 - UV Inhibitor
 - Robust Anti-oxidants
 - Proprietary hardening and release agent
- **Impact and Corrosion resistance protects integrity of original equipment**

[THE LINER THAT WORKS. ANYTIME. ANYWHERE.]

Incredible Strength and Durability

- 100% Virgin UHMW-PE
- Glass beads formulated throughout the liner for extreme abrasion resistance.
- Highest Impact Strength and Highest abrasion resistant liner on the market.
- Designed for abrasive materials such as pig iron, auto fluff, rip rap, crushed glass, bottom ash, foundry work, etc.
- Save the weight on a stainless-steel floor by using the HAULK instead - more protection, better release, less weight!

Haul Away the Savings

DURAPRO liners are bottom-line friendly. Not only is the up-front cost economical, but the payback is quick because:

- Aggregate carry-back is significantly reduced – increasing the number of loads hauled each day
- The original dump bed is protected – reducing floor and hoist replacement and general maintenance
- Heavy-Duty Reprocessed UHMW-PE
- 2% silicone provides superior release and better wear. Best releasing reprocessed liner on the market.
- Made with added virgin for strength, no wide-spec or off-spec resin used.

[Over the Road Dump Linings.]

ONE PIECE LINERS UP TO 16' WIDE!

- Stock Kits ready to ship within a few days!
- Extensive Dealer Network in North America!
- Superior Service at all points of contact!
